

INTERIM GUIDANCE FOR CHILD CARE AND DAY CAMP PROGRAMS DURING THE COVID-19 PUBLIC HEALTH EMERGENCY

When you have read this document, you can affirm at the bottom.

As of June 26, 2020

Purpose

This Interim Guidance for Child Care and Day Camp Programs during the COVID-19 Public Health Emergency ("Interim COVID-19 Guidance for Child Care and Day Camp Programs") was created to provide owners/operators of child care and day camp programs and their employees, parents/guardians and visitors with precautions to help protect against the spread of COVID-19.

This guidance applies only to day child care and camp programs. It does not include overnight child care and camp programs, which are not authorized to operate at this time.

These guidelines are minimum requirements only and any employer is free to provide additional precautions or increased restrictions. These guidelines are based on the best-known public health practices at the time of publication, and the documentation upon which these guidelines are based can and does change frequently. The Responsible Parties – as defined below – are accountable for adhering to all local, state and federal requirements relative to child care and day camp programs and activities. The Responsible Parties are also accountable for staying current with any updates to these requirements, as well as incorporating same into any activities and/or Site Safety Plan.

Background

On March 7, 2020, Governor Andrew M. Cuomo issued [Executive Order 202](#), declaring a state of emergency in response to COVID-19. Community transmission of COVID-19 has occurred throughout New York. To minimize further spread, social distancing of at least six feet must be maintained between individuals, where possible.

On March 20, 2020, Governor Cuomo issued [Executive Order 202.6](#), directing all non-essential businesses to close in-office personnel functions. Essential businesses, as defined by Empire State Development Corporation (ESD) [guidance](#), were not subject to the in-person restriction, but were, however, directed to comply with the guidance and directives for maintaining a clean and safe work environment issued by the New York State Department of Health (DOH), and were strongly urged to maintain social distancing measures. ESD designated child care as an essential service.

On April 12, 2020, Governor Cuomo issued [Executive Order 202.16](#), directing essential businesses to provide employees, who are present in the workplace, with a face covering, at no-cost, that must be used when in direct contact with customers or members of the public during the course of their work. On April 15, 2020, Governor Cuomo issued [Executive Order 202.17](#), directing that any individual who is over age two and able to medically tolerate a face-covering must cover their nose and mouth with a mask or cloth face-covering when in a public place and unable to maintain, or when not maintaining, social distance. On April 16, 2020, Governor Cuomo issued [Executive Order 202.18](#), directing that everyone using public or private transportation carriers or other for-hire vehicles, who is over age two and able to medically tolerate a face covering, must wear a mask or face covering over the nose and

mouth during any such trip. It also directed any operators or drivers of public or private transport to wear a face covering or mask which covers the nose and mouth while there are any passengers in such a vehicle. On May 29, 2020, Governor Cuomo issued [Executive Order 202.34](#), authorizing business operators/owners with the discretion to deny admittance to individuals who fail to comply with the face covering or mask requirements. As such, child care and day camp staff are required to wear face coverings at all times while caring for or otherwise interacting with children. This applies to all modalities, even those providing care in their own residence.

On April 26, 2020, Governor Cuomo [announced](#) a phased approach to reopen industries and businesses in New York in phases based upon a data-driven, regional analysis. On May 4, 2020, the Governor [provided](#) that the regional analysis would consider several public health factors, including new COVID-19 infections, as well as health care system, diagnostic testing, and contact tracing capacity. On May 11, 2020, Governor Cuomo [announced](#) that the first phase of reopening would begin on May 15, 2020 in several regions of New York, based upon available regional metrics and indicators. On May 29, 2020, Governor Cuomo [announced](#) that the second phase of reopening would begin in several regions of the state, and announced the use of a new early warning dashboard that aggregates the state's expansive data collection efforts for New Yorkers, government officials, and experts to monitor and review how the virus is being contained to ensure a safe reopening. On June 2, 2020, Governor Cuomo [announced](#) that summer day camps can open statewide on June 29, 2020.

Important Note: Young children/campers (i.e., those that are not yet in kindergarten) do not need to wear face coverings when they are in child care or day camp program facility or area. Older children/campers are encouraged but not required to wear face coverings as feasible. Face coverings should not be used by children under the age of 2, or for anyone who is unable to medically tolerate such covering, including children/campers for whom such covering would impair their health or mental health, or where such covering would present a challenge, distraction, or obstruction to the child care or day camp programs.

In addition, the outdoor space that belongs to and/or is exclusively used by the child care or day camp program is not considered a public place for the purposes of this guidance. Children/campers are not required to wear a face covering when utilizing the outdoor space that belongs to and/or is exclusively used by the child care or day camp program. Child care programs and day camps that have access to a pool must adhere to State and DOH guidelines regarding swimming pools.

In addition to the following standards, the owners/operators of child care programs and day camps must continue to comply with the guidance and directives for maintaining clean and safe work environments issued by DOH.

Please note that where guidance in this document differs from guidance issued by New York State, or the respective licensing or oversight body, such as the New York State Office of Children and Family Services (OCFS), DOH, or the New York City Department of Health and Mental Hygiene, the more recent guidance shall apply.

Standards for Responsible Child Care and Day Camp Programs Operating in New York State:

No child care or day camp program can operate without meeting the following minimum State standards, as well as applicable federal requirements, including but not limited to such minimum standards of the Americans with Disabilities Act (ADA), Centers for Disease Control and Prevention (CDC), Environmental Protection Agency (EPA), and United States Department of Labor's Occupational Safety and Health Administration (OSHA).

The State standards contained within this guidance apply to all child care and day camp programs in operation during the COVID-19 public health emergency until rescinded or amended by the State. The child care or day camp owner/operator/manager, or another party as may be designated by the child care or day camp owner/operator/manager (in either case, “the Responsible Parties”) shall be responsible for meeting these standards.

The following guidance is organized around three distinct categories: people, places, and processes.

I. PEOPLE

A. Physical Distancing

- Responsible Parties should ensure that their employees maintain a distance of at least six feet from other employees at all times, unless safety or the core activity requires a shorter distance (e.g. jointly caring for a child or responding to the needs of a camper). However, any time that employees are less than six feet from one another, they must wear acceptable face coverings.
 - Acceptable face coverings for COVID-19 include but are not limited to cloth-based face coverings and disposable masks that cover both the mouth and nose.
 - However, cloth, disposable, or other homemade face coverings are not acceptable face coverings for workplace activities that typically require a higher degree of protection for personal protective equipment (PPE) due to the nature of the work. For those activities, N95 respirators or other PPE used under existing industry standards should continue to be used, as is defined in accordance with [OSHA guidelines](#).
- Responsible Parties must ensure that employees wear face coverings at all times when interacting with children or campers, regardless of the distance between the employee and children/campers.
- Responsible Parties must ensure that employee and children/camper groupings are as static as possible by having the same group of children/campers stay with the same staff whenever and wherever possible. Group size must be limited to no more than fifteen (15) children or campers, unless a small regulatory group size applies (e.g. toddlers, infants). The restriction on group size does not apply to employees/staff.
 - Responsible Parties must limit groups to 15 or fewer children/campers, excluding employees/staff, in a specific area (e.g. room) at any given time.
 - Responsible Parties must ensure that different stable groups of up to 15 children/campers have no or minimal contact with one another or utilize common spaces at the same time, to the greatest extent possible.
 - Responsible Parties should maintain a staffing plan that does not require employees to “float” between different classrooms or groups of children, unless such rotation is necessary to safely supervise the children/campers due to unforeseen circumstances (e.g. staff absence).
 - If Responsible Parties allocate time for children/campers to rest during the day (e.g. nap time), Responsible Parties should place children/campers at least six feet apart and head-to-toe for the duration of rest, when feasible.
- Responsible Parties may modify the use and/or restrict the number of work areas and seating areas for their employees, so that individuals are at least six feet apart in all directions (e.g. side-to-side and when facing one another) and are not sharing work areas without cleaning and disinfection between use. When distancing is not feasible between work areas, Responsible Parties must provide and require the use of face coverings or physical barriers (e.g. plastic shielding walls, in lieu of face coverings in areas where they would not affect air flow, heating, cooling, or ventilation).

- If used, physical barriers should be put in place in accordance with OSHA guidelines.
- Physical barrier options may include strip curtains, cubicles, plexiglass or similar materials, or other impermeable dividers or partitions.
- Shared workstations (e.g. "hot-desks") must be cleaned and disinfected between users.
- Responsible Parties should prohibit the use of small spaces (e.g. supply closets, storage areas, vehicles, kitchens, or restrooms) by more than one employee at a time, unless all employees in such space at the same time are wearing acceptable face coverings. However, even with face coverings in use, occupancy must never exceed 50% of the maximum capacity of the space or vehicle, unless it is designed for use by a single occupant. Responsible Parties should increase ventilation with outdoor air to the greatest extent possible, unless such air circulation poses a safety or health risk (e.g., allowing pollens in or exacerbating asthma symptoms) to children or campers using the facility.
- Responsible Parties should take additional measures to prevent congregation in elevator waiting areas and limit density in elevators, such as enabling the use of stairs.
- Responsible Parties should put in place measures to reduce bi-directional foot traffic using tape or signs with arrows in narrow aisles, hallways, or spaces, and post signage and distance markers denoting spaces of six feet in all commonly used areas and any areas in which lines are commonly formed or people may congregate (e.g. vestibules in large facilities during drop off and pickup).
- Responsible Parties should put in place measures for child/camper drop-off and pick-up procedures to allow for strict social distancing of six feet between parents/guardians and employees.
 - Parents/guardians are not permitted to spend an excessive amount of time in the child care or day camp facility.
- Responsible Parties should consider staggering arrival and drop-times.
 - Responsible Parties should consider, when feasible, having staff receive the child or camper from the parent/guardian at the beginning of the day and bring the child or camper out to the parent/guardian at the end of the day, so that parents/guardians don't have to enter the facility or program area.
- Responsible Parties should develop strategies for limiting the number of parents/guardians into the facility or program area at any time.
- Responsible Parties must post signs throughout the site, consistent with DOH COVID-19 signage. Responsible Parties can develop their own customized signage specific to their workplace or setting, provided that such signage is consistent with the Department's signage. Signage should be used to remind individuals to:
 - Cover their nose and mouth with a mask or cloth face-covering.
 - Properly store and, when necessary, discard PPE.
 - Adhere to physical distancing instructions.
 - Report symptoms of or exposure to COVID-19, and how they should do so.
 - Follow hand hygiene and cleaning and disinfection guidelines.
 - Follow appropriate respiratory hygiene and cough etiquette.

B. Caring for Young Children

- Recognizing that maintaining social distancing is not possible when caring for young children, Responsible Parties must implement precautionary measures for their employees/staff who are taking care of young children and campers during the COVID-19 outbreak, including:
 - Frequent and thorough hand hygiene for both staff and children/campers.
 - Employees may consider wearing an over-large button-down, long sleeved shirt or smock and putting long hair up off the collar in a ponytail or other updo. Shirts and smocks should be washed or laundered after use or whenever soiled.
 - When soiled with a child's secretions (including drool), employees should change the button-down shirt or smock and wash anywhere that came into contact with a child's secretions (e.g. neck or hands).
 - Whenever a child is soiled with secretions, change the child's clothes and, as necessary, clean the child (e.g. wash hands or arms).
 - Children in child care or day camp programs should have multiple changes of clothes on hand in the program facility or area. Responsible Parties should make efforts to have spare changes of clothes for children who either do not have extra clothes or have used their extra clothes, as practicable.
 - Contaminated clothes should be placed in a plastic bag and sent home for laundering, or where applicable, washed on premises.
 - When diapering/providing assistance with toileting, wear gloves, wash hands (staff and child), and follow cleaning and disinfection steps between each child.
 - Reference CDC guidelines, "[Supplemental Guidance for Child Care](#)" for additional information.

C. Child Care Program and Camp Activities

- Responsible Parties should prioritize program activities that maximize social distancing (i.e. minimal person-to-person contact) at all child care and camp program facilities and areas.
- For pool and aquatic activities, Responsible Parties must:
 - Ensure face coverings are not worn while in the water;
 - Keep stable groups of children/campers separated;
 - Encourage water activities where staff can safely supervise older children/campers in the water without being in the water themselves versus activities which require staff to be in the water with children/campers;
 - Ensure appropriate social distancing is kept, to the extent possible; and
 - Enhance cleaning and disinfection protocols.
 - Reference CDC guidelines, "[Considerations for Public Pools, Hot Tubs, and Water Playgrounds During COVID-19](#)" for additional information.
- For sport and athletic activities, Responsible Parties must:
 - Keep stable groups of children/campers separated;

- Focus on activities with little or no physical contact (e.g. running or hiking); and
 - Encourage sports that involve less physical closeness over sports that are close-contact or involve shared equipment and gear that cannot be cleaned and disinfected between uses.
 - Encourage activities that are lower risk, such as individual or small group skill-building and conditioning over those that may result in closer, higher-risk contact, such as games.
- Enhance cleaning and disinfection protocols.
 - Reference CDC guidelines, "[Considerations for Youth Sports](#)" for additional information.
- For food services, Responsible Parties must:
 - Serve individual portions to children/campers;
 - Keep stable groups of children/campers separated;
 - Consider staggering mealtimes to reduce occupancy within an indoor space or congregation within an outdoor area; and
 - Separate tables with seating at least six feet apart from other tables, as feasible.
- For excursions and trips, Responsible Parties must discourage excursions away from child care or day camp programs (e.g., field trips).
 - However, if transportation occurs, Responsible Parties must make all reasonable efforts to maintain stable groups of children/campers in vehicles.
 - In any situation where groups of children/campers must be mixed within a vehicle, the Responsible Parties must ensure that seating of individuals, including the employees and children/campers, is arranged in a manner that maximizes the distance between the different groups of children/campers and employees.
 - Responsible Parties must ensure that all individuals, including the driver, employees, and children/campers who are over the age of two and able to medically tolerate a face covering, are wearing face coverings.
 - Responsible Parties should ensure that when children/campers are boarding the vehicle, they are occupying seats from back to front, where feasible.
 - Responsible Parties should increase ventilation, when weather permits, within any vehicle (e.g. opening the top hatches of buses or opening windows) within the discretion of the driver or program operator/manager.
- On rainy days or inclement weather, Responsible Parties should consider setting program or activity capacity that allows for appropriate social distancing between stable groups of children/campers, when, due to the weather, groups must remain indoors or under shelters (e.g. park pavilions).

D. Gatherings in Enclosed Spaces

- Responsible Parties must limit groups to 15 or fewer children/campers, excluding employees/staff, in a specific area at any given time.

- Responsible Parties must take reasonable steps to reconfigure space to limit overall density of rooms to 15 or fewer children/campers.
- Responsible Parties must ensure that different stable groups of up to 15 children/campers have no or minimal contact with one another or utilize common spaces at the same time, to the greatest extent possible.
- Responsible Parties must limit in-person employee gatherings (e.g. breaks, meetings) to the greatest extent possible and use other methods such as video or teleconferencing whenever possible, per CDC guidance "[Interim Guidance for Businesses and Employers to Plan and Respond to Coronavirus Disease 2019 \(COVID-19\)](#)". When videoconferencing or teleconferencing is not possible, Responsible Parties should hold employee/staff meetings in open, well-ventilated spaces and ensure that individuals maintain six feet of social distance between one another (e.g. if there are chairs, leave space between chairs, have individuals sit in alternating chairs).
- Responsible Parties should keep in-person employee meetings brief and minimize the number of participants while adhering to social distancing rules.
- Responsible Parties should encourage social distancing by limiting occupancy or closing non-essential amenities and communal areas that do not allow for social distancing protocols. If open, Responsible Parties must make hand sanitizer or disinfecting wipes available next to equipment near such amenities (e.g. vending machines, communal coffee stations).
- Responsible Parties must put in place practices for adequate social distancing in small areas, such as restrooms and breakrooms, and signage and systems (e.g. flagging when occupied) to restrict occupancy when social distancing cannot be maintained in such areas; and
- Responsible Parties should stagger schedules for their employees to observe social distancing (i.e., six feet of space) for any gathering (e.g. coffee breaks, meals, and shift starts/stops).

E. Workplace Activity

- Responsible Parties must take measures to reduce interpersonal contact and congregation, through methods such as:
 - limiting-person presence to only those staff who are necessary to be on site;
 - adjusting workplace hours;
 - reducing on-site workforce to accommodate social distancing guidelines;
 - shifting design (e.g. A/B teams, staggered arrival/departure times);
 - prioritizing tasks that allow for social distancing (e.g. smaller team/classroom activities) over those that do not (e.g. activities that involve multiple teams or different groups of children); and/or
 - avoiding multiple child care or day camp teams working in one area by staggering scheduled tasks and using signs to indicate occupied areas.

F. Movement and Commerce

- Responsible Parties must prohibit non-essential visitors on site, to the extent possible.

- Responsible Parties must establish designated areas for pickups and deliveries, limiting contact to the extent possible.
 - Responsible Parties must ensure employees/staff practice hand hygiene before and after transferring a delivery (e.g. practice hand hygiene before starting to load items; and once all items have been loaded, finish by practicing hand hygiene again).
- Responsible Parties should limit on-site interactions (e.g. designate areas for employees leaving their shifts and a separate area for employees starting their shifts, designate an ingress and egress for parents/guardians/caregivers dropping off/picking up their child) and movements (e.g. employees should remain near their designated areas as often as possible).
- Where feasible, Responsible Parties should limit the number of entrances to (1) manage the flow of people into the facility and (2) facilitate health screenings, as described below, while maintaining compliance with fire and other safety regulations.
 - Develop a plan for people to maintain six feet of social distance while waiting inside or outside of the facility or site for screening, as applicable.

II. PLACES

A. Protective Equipment

- In addition to the necessary PPE as required for certain child care and day camp activities, Responsible Parties must procure, fashion, or otherwise obtain acceptable face coverings, and provide such coverings to their employees while at work at no cost to the employee. An adequate supply of face coverings, masks and other required PPE should be on hand in the event an employee needs a replacement. Acceptable face coverings include, but are not limited to, cloth (e.g. homemade sewn, quick cut, bandana), surgical masks, N95 respirators, and face shields.
 - Responsible Parties must work with any entities with which they have contracted to agree upon who will provide PPE to contractors or vendors who are physically present on site.
- Face coverings must be cleaned or replaced after use and may not be shared. Please consult the CDC [guidance](#) for additional information on cloth face coverings and other types of PPE well as instructions on use and cleaning.
- Responsible Parties must allow their employees to use their own acceptable face coverings but cannot require their employees to supply their own face coverings. Further, this guidance shall not prevent employees from wearing their personally owned additional protective coverings (e.g. surgical masks, N95 respirators, or face shields), or if the Responsible Parties otherwise requires employees to wear more protective PPE due to the nature of their work. Employers should comply with all applicable OSHA standards.
- Responsible Parties must train their employees on how to adequately put on, take off, clean (as applicable), and discard PPE, including but not limited to, appropriate face coverings.
- Responsible Parties must put in place reasonable measures to limit the sharing of objects, such as electronic equipment, arts and craft materials, touchscreens, as well as the touching of shared surfaces; or, require employees to wear gloves (trade-appropriate or medical) when in contact with shared objects or frequently touched surfaces; or, require workers and children/campers to practice hand hygiene before and after contact.

- Responsible Parties should consider installing physical barriers at reception and security desks.
 - As mentioned above, physical barriers (e.g. plexiglass or similar materials) should be put in place with accordance with [OSHA guidelines](#).

C. Hygiene, Cleaning, and Disinfection

- Responsible Parties must ensure adherence to hygiene and cleaning and disinfection requirements as advised by the CDC and DOH, including "[Guidance for Cleaning and Disinfection of Public and Private Facilities for COVID-19](#)," and the "[STOP THE SPREAD](#)" poster, as applicable. Responsible Parties must maintain logs that include the date, time, and scope of cleaning and disinfection.
- Employees/staff and children/campers must perform hand hygiene immediately upon entering the program.
- Responsible Parties must provide and maintain hand hygiene stations on site, as follows:
 - For handwashing: soap, running warm water, and disposable paper towels.
 - For hand sanitizing: an alcohol-based hand sanitizer containing at least 60% alcohol for areas where handwashing facilities may not be available or practical.
 - Make hand sanitizer available throughout common areas on site. It should be placed in convenient locations, such as at entrances, exits, elevators, and security/reception desks.
- Responsible Parties should place signage near hand sanitizer stations indicating that visibly soiled hands should be washed with soap and water; hand sanitizer is not effective on visibly soiled hands.
- Responsible Parties should place receptacles around the facility for disposal of soiled items, including PPE.
- Responsible Parties must require children and staff to practice hand hygiene:
 - Upon arrival to the first program activity;
 - Between all program activities;
 - After using the restroom;
 - Before eating; and,
 - Before departing the last program activity.
- Responsible Parties must provide appropriate cleaning and disinfection supplies for shared and frequently touched surfaces (e.g. door handles, multi-seat strollers, handrails, toys, art supplies, areas where children eat) and encourage their employees to use these supplies following manufacturer's instructions for use before and after use of these surfaces, followed by hand hygiene.
- Responsible Parties must conduct regular cleaning and disinfection of the site and more frequent cleaning and disinfection for high risk areas (e.g. common areas, doorknobs, handrails, bathrooms, kitchens) used by many individuals and for frequently touched surfaces. Cleaning and disinfection must be rigorous and ongoing and should occur at least after each shift, daily, or more frequently as needed. Please refer to DOH's "[Interim Guidance for Cleaning and Disinfection of Public and Private Facilities for COVID-19](#)" for detailed instructions on how to clean and disinfect facilities.
 - Responsible Parties must ensure regular cleaning and disinfection of restrooms. Restrooms should be cleaned and disinfected more often depending on frequency of use.

- Responsible Parties must ensure distancing rules are adhered to by using signage, occupied markers, or other methods to reduce reducing restroom capacity where feasible.
- Responsible Parties must ensure that equipment and toys are regularly cleaned and disinfected using registered disinfectants, please consult the Department of Environmental Conservation's (DEC) [list of products](#) registered in New York State and identified by the EPA as effective against COVID-19.
- Responsible Parties must implement measures that limit children/campers from using toys that cannot be cleaned and sanitized, (e.g. soft toys, dress-up clothes, puppets).
 - Responsible parties must strongly encourage children not to bring in toys from home. Should a toy from home be brought to the child care or day camp facility or area, Responsible Parties must ensure that children do not share the toy with others.
- Responsible Parties must implement measure to limit sharing of personal items between children/campers by keeping each child's or camper's belongings separated from others' and in individually labeled containers or areas and ensure they are taken home and cleaned and disinfected regularly, as possible.
- For child care or day camp programs that offer a rest period (e.g., nap) for children or campers, Responsible Parties must make individual clean bed coverings available for each child/camper requiring a rest period. Bedding, which is the removable and washable portion of the sleeping environment, must not be shared between children unless cleaned and disinfected. Sleeping surfaces, including bedding, must not come in contact with the sleeping surfaces of another child's rest equipment during storage. Mats and cots must be stored so that the sleeping surfaces do not touch when stacked.
- If cleaning and disinfection products or the act of cleaning and disinfecting causes safety hazards or degrades the material or electronics, Responsible Parties must put in place hand hygiene stations between use and/or supply disposable gloves and/or limitations on the number of employees using such electronics.
- Responsible Parties must provide for the cleaning and disinfection of exposed areas in the event an individual is confirmed to have a positive case of COVID-19, with such cleaning and disinfection to include, at a minimum, all heavy transit areas and high-touch surfaces (e.g. dining areas, handrails, door handles, vending machines, communal coffee stations).
- CDC guidelines on "[Cleaning and Disinfecting Your Facility](#)" if someone is suspected or confirmed to have COVID-19 are as follows:
 - Close off areas used by the person suspected or confirmed to have COVID-19.
 - Affected areas need to be closed off and cleaned and disinfected.
 - Shared building spaces used by the individual must also be shut down, cleaned and disinfected (e.g. elevators, lobbies, outdoor common space).
 - Open outside doors and windows to increase air circulation in the area, to the extent practicable while maintaining all health and safety standards.
 - Wait 24 hours before you clean or and disinfect. If 24 hours is not feasible, wait as long as possible.
 - Clean and disinfect all areas used by the person suspected or confirmed to have COVID-19, such as offices, bathrooms, common areas, and shared equipment.
 - Once the area has been appropriately cleaned and disinfected, it can be reopened for use.

- Employees without close or proximate contact with the person suspected or confirmed to have COVID-19 can return to the work area immediately after cleaning and disinfection.
 - Refer to DOH’s [“Interim Guidance for Public and Private Employees Returning to Work Following COVID-19 Infection or Exposure”](#) for information on “close or proximate” contacts.
- If more than seven days have passed since the person suspected or confirmed to have COVID-19 visited or used the facility, additional cleaning and disinfection is not necessary, but routine cleaning and disinfection should continue.
- Responsible Parties must prohibit shared food and beverages among employees (e.g. self-serve meals and beverages). If the staff eat separately from the children, Responsible Parties should encourage staff to bring lunch from home, and reserve adequate space for employees to observe social distancing while eating meals.

D. Phased Reopening

- Responsible Parties are encouraged to phase-in reopening activities so as to allow for operational issues to be resolved before production or work activities return to normal levels. Responsible Parties should consider limiting the number of employees’ hours, and number of children/campers available to be served when first reopening so as to provide operations with the ability to adjust to the changes.
- Responsible Parties should monitor staff absenteeism and have a roster of trained back-up staff, as practicable.

E. Communications Plan

- Responsible Parties must affirm that they have reviewed and understand the state-issued industry guidelines, and that they will implement them.
- Responsible Parties must train all employees and staff on the applicable precautions and policies contained within this guidance either remotely or in-person, using appropriate social distancing and requiring face coverings for all participants.
- Responsible Parties should train staff on how to support children’s development of good public and individual health behaviors to prevent the spread of COVID-19, including hand hygiene and social distancing.
- Responsible Parties should designate a staff person to be responsible for responding to COVID-19 concerns. Employees and parent/guardians should know who this person is and how to contact them.
- Responsible Parties should develop a communications plan for employees, parents/guardians and children/campers that includes applicable instructions, training, signage, and a consistent means to provide employees with information. Responsible Parties may consider developing webpages, text and email groups, and social media.
- Responsible Parties should encourage individuals to adhere to CDC and DOH guidance regarding the use of PPE, specifically face coverings, through verbal communication and signage, as appropriate.
- Responsible Parties should post signage inside and outside of the facility to remind individuals to adhere to proper hygiene, social distancing rules, appropriate use of PPE, and cleaning and disinfection protocols.

III. PROCESSES

A. Screening and Testing

- Responsible Parties must instruct staff to stay home if they are sick and remind parents/guardians to keep sick children/campers home.
 - Staff and parents/guardians should look out for signs and symptoms of COVID-19 in children/campers.
- Responsible Parties must implement mandatory daily health screening practices of their employees and visitors, such as contractors or vendors. Screening is also mandatory for children/campers, either directly or through their parent/guardian.
 - Screening practices may be performed remotely (e.g. by telephone or electronic survey), before the individual reports to the child care or day camp program, to the extent possible; or may be performed on site.
 - For children/campers arriving to a program via bus transportation and for employees who provide supervision on the bus, screening must be completed prior to boarding the bus, where feasible.
 - Screening should be coordinated to prevent individuals from intermingling in close or proximate contact with each other prior to completion of the screening.
 - At a minimum, screening must be completed using a questionnaire that determines whether the individual has:
 - (a) knowingly been in close or proximate contact in the past 14 days with anyone who has tested positive for COVID-19 or who has or had symptoms of COVID-19;
 - (b) tested positive for COVID-19 in the past 14 days; and/or
 - (c) has experienced any symptoms of COVID-19 in the past 14 days.
- Refer to CDC guidance on "[Symptoms of Coronavirus](#)," for the most up to date information on symptoms associated with COVID-19.
 - Responsible Parties must require employees to make visual inspections of children/campers, throughout the day, for signs of potential COVID-19 illness which could include flushed cheeks, rapid breathing or difficulty breathing (without recent physical activity), fatigue, or extreme fussiness.
- Responsible Parties should require employees and parents/guardians to immediately disclose if and when their responses, or responses of their children/camper, to any of the aforementioned questions changes, such as if they begin to experience symptoms, including during or outside of child care or day camp hours.
- The child care or day camp program must prohibit children, staff, and parents/guardians from entering the site, or boarding the bus to the site, if they are showing symptoms of COVID-19.
- In addition to the screening questionnaire, temperature checks may also be conducted per U.S. Equal Employment Opportunity Commission or DOH guidelines. Responsible Parties are prohibited from keeping records of employee health data (e.g. the specific temperature data of an individual), but are permitted to maintain records that confirm individuals were screened and the result of such screening (e.g. pass/fail, cleared/not cleared).

- Responsible Parties must ensure that any personnel performing screening activities, including temperature checks, are appropriately protected from exposure to potentially infectious individuals seeking to enter the site. Personnel performing screening activities should be trained by employer-identified individuals who are familiar with CDC, DOH, and OSHA protocols.
- Screeners should be provided and use PPE, including at a minimum, a face mask, and may include gloves, a gown, and/or a face shield.
- An employee, parent/guardian, or child/camper who screens positive for or exhibits symptoms of COVID-19 must not be allowed to enter the facility or area, and must be sent home with instructions to contact their healthcare provider for assessment and testing.
 - Children or campers who are being sent home because of a positive screen (e.g. onset of COVID-19 symptoms) must be immediately separated from other children or campers and supervised until their parent/guardian or emergency contact can retrieve them from the program facility or area.
 - Responsible Parties should provide such individuals with information on healthcare and testing resources.
 - Responsible Parties must immediately notify the state and local health department about the case if test results are positive for COVID-19.
- Responsible Parties should refer to DOH's "[Interim Guidance for Public and Private Employees Returning to Work Following COVID-19 Infection or Exposure](#)" regarding protocols and policies for employees, parents/guardians, or children/campers seeking to return to work or the site after a suspected or confirmed case of COVID-19 or after such person has had close or proximate contact with a person suspected or confirmed with COVID-19.
- Responsible Parties must designate a central point of contact, which may vary by activity, location, shift or day, responsible for receiving and attesting to having reviewed all questionnaires, with such contact also identified as the party for individuals to inform if they later are experiencing COVID-19-related symptoms, as noted on the questionnaire.
 - Identified point of contact for the site should be prepared to receive notifications of suspected or positive cases and initiate the respective cleaning and disinfection procedures.
- Responsible Parties must designate a site safety monitor whose responsibilities include continuous compliance with all aspects of the site safety plan, for employees.
- To the extent possible, Responsible Parties should maintain a log of every person, including employees, parents/guardians, children, and any essential visitors who may have close or proximate contact with other individuals at the work site or area; excluding deliveries that are performed with appropriate PPE or through contactless means. Log should contain contact information, such that all contacts may be identified, traced and notified in the event an employee, parent/guardian, child or visitor is diagnosed with COVID-19. Responsible Parties must cooperate with state and local health department contact tracing efforts.
- In the event that a parent/guardian of a child/camper in the child care or day camp program must be isolated because they have tested positive for, or exhibited symptoms of, COVID-19, Responsible Parties must advise the parent/guardian that they cannot enter the site for any reason, including picking up their child.
 - If the parent/guardian – who is a member of the same household as the child/camper – is exhibiting signs of COVID-19 or has been tested and is positive for the virus, Responsible Parties

must utilize an alternate parent/guardian or emergency contact authorized by the parent to come pick up the child. As a “close contact,” the child/camper must not return to the child care or day camp for the duration of the quarantine.

- If the parent/guardian – who is a member of the same household as the child/camper – is being quarantined as a precautionary measure, without symptoms or a positive test, child care or day camp staff should walk out or deliver the child/camper to the parent/guardian at the boundary of, or outside, the premises. As a “contact of a contact,” the child/camper may return to the child care or day camp during the duration of the quarantine.
- If a child/camper or their household member becomes symptomatic for COVID-19 and/or tests positive for COVID-19, the child must quarantine and may not return or attend the child care or day camp program until after quarantine is complete.

B. Tracing and Tracking

- Responsible Parties must notify the state and local health department immediately upon being informed of any positive COVID-19 test result by an employee or child/camper at their site.
- Responsible Parties must designate a site safety monitor whose responsibilities include continuous compliance with all aspects of the site safety plan.
- In the case of an employees, parent/guardian, or child/camper testing positive, the Responsible Parties must cooperate with the state and local health department as required to trace all contacts in the workplace, and the state and local health department where the site is located must be notified of all individuals who entered the site dating back to 48 hours before the employee, parent/guardian, or child/camper first began experiencing COVID-19 symptoms or tested positive, whichever is earlier. Confidentiality must be maintained as required by federal and state law and regulations.
- State and local health departments may, under their legal authority, implement monitoring and movement restrictions of infected or exposed persons including home isolation or quarantine.
- Individuals who are alerted that they have come into close or proximate contact with a person with COVID-19, and have been alerted via tracing, tracking or other mechanism, are required to self-report to the child care or day camp owner/operator/manager at the time of alert and shall follow the protocol referenced above.

IV. EMPLOYER PLANS

Responsible Parties must conspicuously post completed safety plans on site for employees. The State has made available a business reopening safety plan template to guide business owners and operators in developing plans to protect against the spread of COVID-19.
